## DETAILED ACTION

### ***Response to Amendment***

Amendment B filed 3/27/3 and entered as Paper No. 14 forms the basis of this Office Action. Applicant provisionally elected the invention of a *semiconductor laser device (and method of using the same)* and has *further substantially amended the claims* so as to overcome an initial requirement to elect either a semiconductor laser device or a semiconductor light-emitting device. Amended claims 1-77 are directed to a semiconductor laser device and its use.

With reference to the telephonic interview on 3/14/3 the examiner agreed that it is a reasonable approach to amend the claims according to Amendment B but left open the possibility of a further election requirement. After consideration of the specification the following election-of-species requirement is deemed proper:

### ***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention: First Embodiment (sections [0043] – [0057] and Figures 1-4: integrated diffraction grating); Second Embodiment (sections [0058] – [0063] and Figures 5-7: shortened grating for multiple mode operation); Third Embodiment (sections [0064] – [0068] and Figures 8-11: chirped diffraction grating); Fourth Embodiment (sections [0069] – [0072] and Figure 12: internal isolator with Peltier

element); Fifth Embodiment (sections [0073] - [0079] and Figures 13-16: with laser beams coupled to multiplexing coupler).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 36 appear to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Johannes P Mondt whose telephone number is 703-306-0531. The examiner can normally be reached on 8:00 - 18:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan J Flynn can be reached on 703-308-6601.
